

Exhibition Notice

The MEL council will exhibit at the 23rd Japan International Seafood & Technology Expo for the purpose of the spread of marine eco-label systems and better recognition of MEL. We implement the thorough infectious disease measures under the guideline of the Koto-ku public health center, Tokyo and the Japanese Government. In addition to the guidance of the certification system, and the introduction of the certified marine products and ingredients, we will present a model of fresh fish counter using MEL certified seafoods. Furthermore, we introduce our enhanced PR activity for children and family.

All the people interested in marine eco-label system and the procurement of the sustainable marine products are welcome, feel free to drop in our booth!

Person in charge: Kobayashi, Akimoto
